## DESK FAN ASSEMBLING INSTRUCTIONS

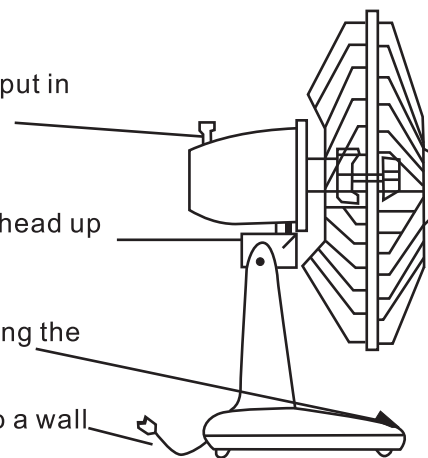

## OPERATING INSTRUCTIONS

To make the fan head oscillate, put in the knob on the motor housing.

To adjust vertical angle, put fan head up or down as desired.

Speed is controlled by depressing the push button piano switches.

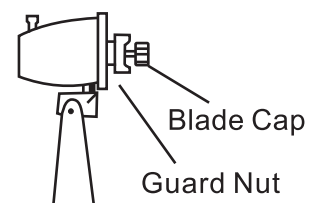

Plug the power supply cord into a wall outlet.

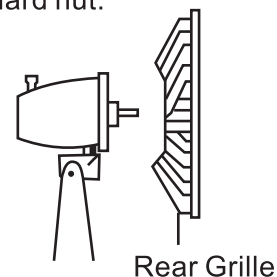

## ASSEMBLING INSTRUCTIONS

The safety device is to be reinstalled or remounted as previously installed.

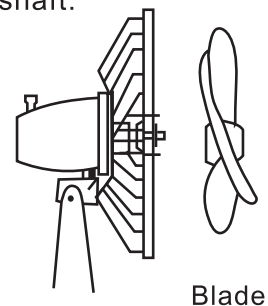

Unscrew the blade cap by running clockwise & rear guard mounting nut by turning counter clockwise.

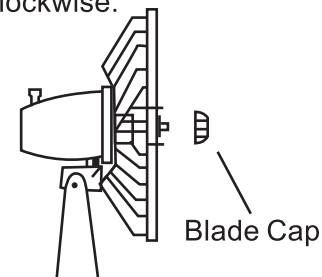

Put rear guard on motor shaft and screw with guard nut.

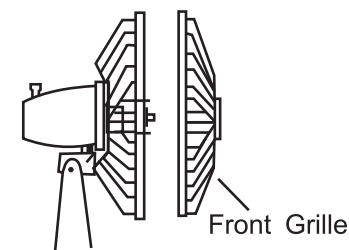

Slide blade on motor shaft.

Screw blade cap on shaft by turning counter clockwise.

Put front grille and close clips or screw grille ring to secure grilles together.

## MAINTENANCE

1. Before cleaning unplug fan first.
2. Clean the fan with soft cloth and neutral detergent, but not gasoling or other solutions.
3. Add a few drops of high quality lubricating oil to the bearings of the motor before the first operation every year.
