The Company

Founded in 1984, it started its activity in the telecommunications area, with the manufacture and assembly of fixed line telephones and the commercialization of telephone PBX.

Foreseeing in market an opportunity for strategic diversification, the company decides to explore a new business. In parallel with its activity in telecommunications, it invests in the development of new products with the own brand HÆGER in the household appliances range, betting always on a strict quality control.

Its current activity focuses predominantly on small and large home appliances, with one of the most diversified ranges on the market.

Covering the whole national territory, the company in Portugal working together with its retail and wholesale partners, bets clearly on the traditional trade.

With the strong development of the home appliances business, in 2009 the company felt the need to increase its facilities with the construction of a new HÆGER building in the Lisbon district.

In 2013, the company took its first step on the road to internationalization, with the construction of a new HÆGER building in Cape Verde, having in 2014 taken a second step with the opening of the office in Spain with the creation of HAEGER SPAIN and more recently, in 2018, by opening an office in China.

The export market is increasingly a priority, especially in Spain, Cape Verde, other Portuguese-speaking countries, Europe and Asia.

Our mission is to reach the final consumer, through our partners and distributors, with a solid, wide and competitive range of products based on the Trinomial Quality, Price and Design.

The mission of the company is based on a close relationship with our partners / clients. A "win-win-win" relationship in which the manufacturer, the distributor and the final customer can benefit. The trust, seriousness, professionalism and proactivity of our team are always at the service of our business partners.
